# STATE OF MONTANA ADMINISTRATOR OF GROUNDWATER CODE OFFICE OF STATE ENGINEER

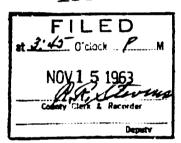

DECESTION NOV 18 1963

3. Date or approximate date of earliest beneficial use: and how continuous the use has been. 1727  4. The amount of groundwater claimed (in miner's inches or gallon per minute).  5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner thereof the owner thereof the possible. Each small square represents 10 to appropriation and place of use. If possible. Each small square represents 10 to acres.  6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of the well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well or the general specifications of any other works for the withdrawal of groundwater.  8. The log of formations encountered in the drilling of each well if available.		PO.
2. The beneficial use on which the claim is based.  2. The beneficial use on which the claim is based.  3. Date or approximate date of earliest beneficial use: and now continuous the use has been.  4. The amount of groundwater claimed (in miner's inches or gallon per minute).  5. If used for irrugation, give the acreage and description of the land to which water has been applied and name of the owner thereous the same square represents 10 the construction of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of same withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater withdrawn each year.  10. The log of formations encountered in the drilling of each well if available.		
2. The beneficial use on which the claim is based  3. Date or approximate date of earliest beneficial use: and now continuous the use has been 1772  4. The amount of groundwater claimed (in miner's inches or gallon per minute).  5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner there.  5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner there.  6. The means of withdrawing such water from the ground and the location of use, if possible.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table  9. So far as it may be available, the type, size and depth of gaph well or the general specifications of any othe works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of groundwater.  6. The means of withdrawing such water from the ground and the location of groundwater.  7. The date of commencement and completion of the construction of the well, wells, or other works for with drawal of groundwater.  8. The depth of water table  9. So far as it may be available, the type, size and depth of gaph well or the general specifications of any othe works for the withdrawal of groundwater withdrawn each year.  10. The log of formations encountered in the drilling of each well if available.  11. The log of formations encountered in the drilling of each well in carrying out the policy of this act, including reference to book and page of any county record.	County of Falton	State of 177 on 1
2. The beneficial use on which the claim is based.  3. Date or approximate date of earliest beneficial use: and how continuous the use has been.  4. The amount of groundwater claimed (in miner's inches or gallonger minute).  5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner thereous of use, if possible, hach small square represents 10 seres.  6. The means of withdrawing such water from the ground and the location at each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater.  6. The log of formations encountered in the drilling of each well if available.  9. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.		to the Montana laws in effect prior to sandary 1, 1902, as follows.
4. The amount of groundwater claimed (in miner's inches or gallot per minute).  5. If used for irrigation, give the acreage and description of the lam to which water has been applied and name of the owner thereo which small square represents 10 seres.  6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater withdrawn each year.  1. The log of formations encountered in the drilling of each well if available.  2. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.		2. The beneficial use on which the claim is based.
4. The amount of groundwater claimed (in miner's inches or gallon per minute)  5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner thereo which water point of appropriation and place of use, if possible care small square represents 10 ceres.  6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for with drawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for with drawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any othe works for the withdrawal of groundwater withdrawn each year.  1. The log of formations encountered in the drilling of each well if available.  2. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.		3. Date or approximate date of earliest beneficial use; and how con tinuous the use has been 1922
5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner thereof to which water has been applied and name of the owner thereof to which water passible. Such small square represents 10 for the means of withdrawing such water from the ground and the location of each well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater.  6. The means of withdrawing such water from the ground and the location of each well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater.  8. The log of formations encountered in the drilling of each well if available.  9. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.	τ	
5. If used for irrigation, give the acreage and description of the land to which water has been applied and name of the owner thereof the serious of appropriation and place of use, if possible. Each small square represents 10 certs.  6. The means of withdrawing such water from the ground and the location abeach well or other means of withdrawal.  7. The date of commencement and completion of the construction of the well, wells, or other works for withdrawal of groundwater.  8. The depth of water table.  9. So far as it may be available, the type, size and depth of each well or the general specifications of any other works for the withdrawal of groundwater.  10. The estimated amount of groundwater withdrawn each year.  11. The log of formations encountered in the drilling of each well it available.  12. Such other information of a similar nature as may be useful in carrying out the policy of this act, including reference to book and page of any county record.		4. N E	2. The beneficial use on which the claim is based.  3. Date or approximate date of earliest beneficial use; and how continuous the Use has been to ate of lander use.  1948 and has been formulations.
	1. The amount of groundwater claimed (in miner's inches or gallons per minute)
SE <sub>2/4</sub> Sec 34 T 2 R 57 Indicate point of appropriation and place of use, if possible. Each small square represents 10 acres.	5. If used for irrigation, give the acreage and description of the lands to which water has been applied and name of the owner thereof  6. The means of withdrawing such water from the ground and the location of each well or other means of withdrawal
	ompletion of the construction of the well, wells, or other works for with-
8. The depth of water table 20	but
9. So far as it may be available, the works for the withdrawal of grounds	type, size and depth of each well or the general specifications of any other water thank duy when 34 feet deep
10. The estimated amount of groundwat	ter withdrawn each year 7500 gallons
11. The log of formations encountered in	n the drilling of each well if available not available
reference to book and page of any co	nature as may be useful in carrying out the policy of this act, including ounty record
	Signature of Owner Challes Little  Date Dec. 16

Three copies to be filed by the owner with the County Clerk and Recorder of the county in which the well is located.

Please answer all questions. I not applicable, so state Otherwise the form will be returned.
